PROFESSIONAL SUMMARY

Customer Support Specialist with a hybrid technical and empathetic profile and 5+ years of experience (since 2020) in Customer Support and Customer Experience (CX) at tech companies: SaaS, e-commerce and payments. At Tiendanube I handled ~60 multichannel tickets a day in Zendesk with a 2-minute first response time, 100% SLA compliance and 96% CSAT, and supported Customer Success teams with tickets that had a 3-minute response target. I solve Tier 1 and Tier 2 cases, troubleshoot APIs and payment gateways, work with Engineering through GitHub and turn recurring questions into improvements, such as Cuota Nube, a tool I built that cut cost-related inquiries by more than 25%. I complement my profile with Frontend Web Development training (JavaScript, React, SQL) and AI tools.

WORK EXPERIENCE

Tiendanube – Customer Support Specialist (Support Guru) | SaaS / E-commerce | May 2025 – Jun 2026

- Handled ~60 daily multichannel inquiries in Zendesk with a 2-min FRT, 100% SLA and 96% CSAT, resolving Tier 1 and Tier 2 technical cases.
- Also supported the Customer Success teams by handling their customers' tickets, which had to be answered within 3 minutes to avoid breaching the SLA.
- Built **Cuota Nube**, a fees and installments calculator (calculadora-tiendanube.vercel.app), that cut cost-related inquiries by more than 25% and became the basis for the official calculator, earning recognition from Product.
- Retained 150+ stores at risk of churn due to KYC issues and turned negative-rated tickets into positive ones; onboarded 80+ new entrepreneurs with Loom videos, screenshots and personalized follow-up to complete KYC without errors.
- Escalated and tracked bugs with Engineering on GitHub, with workarounds so customers could keep operating; earned recognition. Troubleshoot integrations and APIs with Insomnia across payment gateways (Pago Nube, Mercado Pago, MODO, Ualá Bis); handled chargebacks, verified their resolution in dLocal and built reports.
- Used Tableau to monitor my metrics and look up customers' plans, checking whether they were eligible for lower rates.
- Created Zendesk macros for the Pago Nube team (50+ people) and an Excel tool to calculate the target CSAT; led payment reconciliation with Finance. Used HTML and CSS to customize templates without relying on Engineering.

Europ Assistance – Remote Customer Support & Operations Assistant | Sep 2023 – Dec 2024

- Handled insurance claims and administrative inquiries, managing requests for La Caja Seguros, with 80%+ compliance on operational metrics and SLA under daily quality audits.
- Managed cases and incidents in Salesforce and Neotel, with reports and automations in advanced Excel, solving issues in real time with vendors.

La Nona – Freelance, weekends: Chat Support & Design | Aug 2022 – Mar 2025

Cat Technologies – Customer Support & Retention Agent | Telecom (Personal) | Jun 2020 – Jul 2022

- Customer service and retention for Personal customers: 70+ daily multichannel inquiries under daily quality audits; met the call-time target (5 min max) 95% of the time, with 80% compliance on metrics and FCR. Trained 5 new hires as a buddy over 2 weeks, using support guides and call monitoring; received a recognition award for my work.

PROJECTS

- Cuota Nube** (Fees and installments calculator) | calculadora-tiendanube.vercel.app – Basis for the official Tiendanube calculator.
- CX-Macros** (React, Vite) | cx-macros.vercel.app – Tool for support teams: 12 ready-made templates, editable custom templates (localStorage), favorites, PDF/CSV export, and a “Polish text” feature that fixes punctuation, accents and capitalization.
- Mensuales** (HTML, CSS, JavaScript, Firebase) | gastomensuales-two.vercel.app – Free app used by 20+ people, businesses and everyday users: spending charts, annual summary, budget alerts, PDF/CSV export, CSV import, pesos and dollars. Login with Firebase Authentication and data stored in each user's account.
- Products CRUD** (PHP, MySQL, HTML) | florbagnis.github.io/Crud-Php-Mysql – Learning project: create, read, update and delete products in MySQL; HTML design sample viewable from GitHub.
